DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The language "a light entering the reflecting means and a light exiting the reflecting means" is not understood because light neither enters or exits reflecting means. The claims are interpreted as best as this phrase is understood.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the

Art Unit: 2851

invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Poradish et al.

Poradish discloses a projection apparatus in figure 2 comprising:

- a light source (10) for emitting white light;

- a reflection means (16) for reflecting light from the source;

- a color filter (40) for sequentially passing colored lights and being disposed so that an axis of rotation of the filter is not parallel to an optical axis of light passing through the filter;

- a light valve (30); light passing through the filter being converged.

5. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Sato.

Sato discloses a projection apparatus in figure 19 comprising:

- a light source (11) for emitting white light;

Art Unit: 2851

a reflection means (37) for reflecting light from the source;

a color filter (36) for sequentially passing colored lights;

a light valve (16); light passing through the filter being converged.
